

What is IBM Cloud Pak for Data?

IBM Cloud Pak for Data is a fully-integrated data and AI platform that modernizes how businesses collect, organize, and analyze data and infuse AI throughout their organizations. Built on the Red Hat OpenShift Container Platform, IBM Cloud Pak for Data integrates market-leading IBM Watson AI technology with IBM Hybrid Data Management Platform, DataOps, and governance and business analytics technologies. Together, these capabilities provide the information architecture for AI that meets your ever-changing enterprise needs. With a growing array of IBM and third-party microservices, IBM Cloud Pak for Data runs across any cloud, enabling organizations to more easily integrate their analytics and applications to speed innovation.
